*Reasons for Allowance*

1. Claims 1, 3, 4, and 7-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 17 are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a system for providing guaranteed Quality of Service (QoS) in an IP network, comprising a basic network layer, including edge routers and core routers, for bearing various IP service packets, a service bearer logic layer, planned and configured from the basic network layer and divided into multiple network resource management areas, edge nodes, tandem switching nodes and connections among them between any two nodes, for bearing traffic streams with guaranteed QoS requirements, a bearer control layer, including bearer network resource managers, for managing the bearer network resources of a network resource management area for the service bearer logic layer and basic network layer, and a service control layer, including multiple service control layer server, service entities, for processing service requests, wherein the bearer network resource manager allocates resources and route multiple Label Switched Paths in the service bearer layer for a service, generates a multi-level label stack for the resources and route, wherein the multi-level label stack comprises multiple labels each of the label stands for an LSP of the route, and informs the multi-level label stack to the service bearer layer; and the service bearer logic network forwards the traffic streams of the service along the LSPs represented by the labels configured in the multi-level label stack.

*Conclusion*
